## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - a. With respect to claim 1, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a method of diffusion weighted MR images comprising the step of rotating the odd and even acquisition blades of data acquisition about an origin point with respect to previous acquisition in combination with the remaining limitations of the claim.
  - b. With respect to claim 9, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest an MRI apparatus comprising a computer programmed to rotate each segmented acquisition a prescribed interval about the origin point with respect for each subsequent acquisition in combination with the remaining limitations of the claim.
  - c. With respect to claim 16, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a computer readable storage medium having stored thereon a computer program comprising instructions which when executed by a computer, cause the computer to rotate the strip of k-space for the odd and even data acquisitions for each subsequent echo train in combination with the remaining limitations of the claim.
